# Ideation Phase
# Define the Problem Statements

| Date | 10 September 2022 |
|------|-------------------|
| Team ID | PNT2022TMID48446 |
| Project Name | News Tracker Application |
| Maximum Marks | 2 Marks |

## PROBLEM:

The problem statement aims at displaying the news virtually in an app format where several news have been scheduled in queue for the user to read efficiently without leaving any important news of his/her choice.

## SOLUTION:

The purpose of the project is to develop an application which will display news articles and videos verified and approved at backend. There is no access for multiple region news in the existing system which is over welmed in our system. User can browse news articles and videos on various categories by searching through search box or voice assistance. System will enable user to view news details, images, and related videos.

## Problem Statement:

| Problem Statement (PS) | I am (Customer) | I'm trying to | But | Because | Which makes me feel |
|---|---|---|---|---|---|
| PS-1 | I am Student | I'm trying to get quick access of educational news | But the application push the irrelevant news | Because of poor optimization | Which makes me feel annoying |
| PS-2 | I am blogger | I'm trying to read specific News articles | But it displays unrelated articles | Because of unoptimized filter option | Which makes me feel disappointed |
